Post Feedback Test Case

Test Case ID: postFeedback0100

Test Priority (Low/Medium/High): High

Module Name: Post Feedback

Test Title: Post Feedback Valid

Description: For an authenticated student with valid feedback, validate their content and post it.

Test Designed by: Justin Baldeosingh

Test Designed date: 28-MAR-2021

Test Executed by: <Name>

Test Execution date: <Date>

Pre-conditions: User has selected a course for posting, selects "Creates a post", and authenticates as a student.
Dependencies: Authenticate Student, Categorize Feedback, Filter Feedback

Step	Test Steps	Test Data	Expected Result	Actual Result	Status (Pass/Fail)	Notes
1	User creates the post.	Content = "Good course!"				
2	User clicks "Post" button.		Post is submitted for filtering and categorization.			
3			Post has passed filtering, categorized as "Positive", and successfully posted. User is redirected to course page post listings.			

Post-conditions:
   The filtered feedback post from the authenticated student has been posted, or an error is displayed if caught.
